ABOUT ME

I am skilled and versatile developer capable of handling all aspects of web application development. I have a strong understanding of both front-end and back-end development and I am excited to put my skills to use in a professional setting. I am a quick learner and a team player and I am confident that I can be a valuable asset to any web development team.

PERSONAL PROJECTS

-Spotify Landing Page

- A modern design with an intuitive user interface that is easy to navigate.
- Responsive design for mobile devices.
- User Accounts: Users will be able to create and manage their own accounts, including profile information, payment methods, and account settings.

-Travelling Web Page

- Design and develop a landing page for a travel website
- The design should be modern and attractive with the use of vibrant colors to capture user attention.
- The page should include sections such as About Us, Services Offered, Testimonials, Contact Us etc.
- The website should be mobile friendly and responsive across different devices including desktop computers.

-Calculator

- A user-friendly interface that allows users to input their data and get the results they need.
- The ability for the calculator to perform various calculations based on user inputs and display the results in an easy-to-understand format

-Shopping List

- The user interface should be intuitive and easy to use, with a modern design that is visually appealing.
- It should include an input field for adding items to the list, as well as buttons for removing items from the list or clearing the entire list.
- Additionally, it should have a way of displaying all of the items on the shopping list in an organized manner.

-JavaScript Form Validation

- To validate user input on the client side before it is submitted.
- Customize error messages based on specific criteria such as required fields or invalid characters entered by the user.
